About Me

- AI & GenAI Test Automation Specialist with **10+ years of experience** in automation testing and Salesforce testing, focused on building and validating **AI-driven applications**.
- Hands-on experience in **Generative AI testing**, including **prompt engineering**, **LLM evaluation using Promptfoo, DeepEval, and RAGAS**, as well as **red teaming and RAG validation**. Skilled in using **Python for AI test automation**, helping to validate model responses and improve testing efficiency.
- Strong ability to identify **hallucinations, prompt issues, unsafe outputs, and model inconsistencies**, ensuring reliable and high-quality AI systems. Experienced in creating **clear evaluation reports** to share insights on model performance, risks, and improvements.
- In addition, solid foundation in **traditional QA and automation**, including **Selenium, Tosca, API testing, and Salesforce**, with experience in **end-to-end testing and automation frameworks**.

Key Skills
